Many a Little Life Must be Shipwrecked in Sight of Shore in 1911 if Your Money Does Not Man the Lifeboat of The Hospital's Mercy.

REMEMBER THAT THE WORK OF THE HOSPITAL COVERS ALL ONTARIO. THE SICK CHILD IN ANY PART OF THE PROVINCE WHOSE PARENTS CANNOT AFFORD TO PAY IS TREATED FREE.

Your Money May be as a Cup of Cold Water to the Parched Lips or as a Cool Hand Upon the Fevered Brow of a Suffering Child.

Please Send Your Donation to J. Ross Robertson, Chairman of the Board,
or to Douglas Davidson, Sec.-Treas., College St., Toronto

SPECIAL TO READERS—Please note this report is perforated, so that leaves can be separated and distributed to Public and Sabbath School Children.

Won't the faces of your own little ones smile more brightly upon you this Christmas time if your money is bringing smiles to the faces of God's little ones—the children of poverty and pain?

On the Lawn at The Lakeside Home.

The Home is open May-Sept. inclusive. 350 patients during that time. 100 slept every night on the balconies in the open. Fresh air great health help. Look at this group. All convalescent, bright and cheerful. Eleven little girls—all cured.

Just a Corner in the Girls' Surgical Ward.

This Ward is one of the brightest in the Hospital, and when the photo man appears he finds that his subjects are all anxious to pose.

Your Bank Book may be Glorified into a Book of Golden Deeds if it is Adorned with the Figures of a Cheque Drawn in Favor of
THE HOSPITAL FOR SICK CHILDREN.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

SNAPS FROM THE WARDS

A HAPPY TRIO IN THE GIRLS' MEDICAL.

THIS GROUP INSISTED ON POSING.

THIS NURSE HAS HER ARMS FULL.

The Lakeside Home for Little Children.

This is the Island Home you hear so much about—"Going to The Lakeside" is the subject of talk from the beginning of April—The youngsters all look forward to it with delight—the building sits on six acres of lawn. It is the beauty spot of Toronto Island—Since its opening in 1882, 5,000 patients have been nursed here.

Your eyes would shed tears and your pocket would shed dollars if you could see the suffering of little children as the Hospital sees it, and hear, as the Hospital hears, the misery of their little voices.

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

THE HOSPITAL FOR SICK CHILDREN

THE "ANNUAL" OF THE YEAR

THE THIRTY-FIFTH IN ITS HISTORY

If in the cultivation of the art of reading, literature of the class in this book was selected by those who are fond of reading, there would surely be an interest created that must materialize in some helpful form, which could not but encourage the workers whose mission is the preservation of the child life in this Province.

Books may be made from books, but this book is made from life. Every page records a brief of life or death, and tells how the Hospital has made a rainbow of hope, of health and healing for the children, to shine in the midst of many a mother's tears.

WHAT THIS BOOK CONTAINS.

All that this book contains is gathered from the daily diary of a charity that has a blessing from the thousands, yes, tens of thousands in Ontario who know that "a heart that never hardens, a hand that never tires and a touch that never hurts" is what the Hospital has proved itself to be in the experience of many a suffering child and sorrowing mother.

The beaten paths of literature with all its avenues of glory are, as a rule, not marked with the footprints of those who seek after reading of this kind, even if it does cover the loved work of many great hearted men and women. And yet there are thousands who will not only read this book from cover to cover, but will give the dollars that may be seed of the Hospital's planting from which God's little ones will reap the harvest of health and happiness.

A reading of these printed pages ought to kindle the flame of favor for this work, in the heart of every one whose eye meets these words of appeal.

Books find permanent places on the shelves of libraries. Newspapers are read morning and evening and finally find their way to the waste paper basket. Pamphlets, in many cases, share the fate of the daily journal.

But Hospital literature is looked at askance—most people shy at a Hospital report, the more so if it is a dull compendium of statistics, columns of figures, that are not even dressed up for public edification.

GOOD READING FOR EVERYONE.

Now, this book is not in the foregoing class. It is good reading, even if its statistics may, in the opinion of some, be unattractive. It may not rank alongside of the latest fiction, for it is founded on fact. It may not hold down the reader after the fashion of the ordinary novel—it does something better for it gives the people at large an interesting epitome of the work, of the results of work in the Hospital for Sick Children in Toronto, an institution that opens the gates of mercy to the thousands of little sufferers in Ontario.

The Board, with deep regret, has to announce the passing of Mr. Charles Cockshutt, a member of this Trust. Mr. Cockshutt was an interested and faithful worker. He generously remembered the Charity in his will, and in so doing emphasized his love for an institution with which for many years past he had been connected.

THE STORY OF THE YEAR.

It would be impossible in the few printed pages allotted to the story of one year to give more than a reference to details. So that in the telling of our work for the twelve months ending 30th September, 1910, we have to tabloid the paragraphs, and as briefly as possible show by the results obtained the work we are carrying on in the largest Hospital for Sick Children on this continent—work that is only exceeded in quantity by two other hospitals in the British Empire.

THE HOSPITAL NOT LOCAL, BUT PROVINCIAL.

It must be borne in mind that this institution is not local, but provincial, in its range of work. Its field of labor includes not only the city of Toronto, but the entire province of Ontario. The sick child from any part of the province whose parents cannot afford to pay for treatment is admitted on exactly the same terms as the child who lives within the shadow of the walls of the red pile on College street. The Hospital is free to every little one whose parents are unable to pay. There is no hospital either for adults or children in any part of the empire that has similar conditions for admission.

The endeavor of the Trustees in this review is to give the ten thousand donors who have so generously aided us in carrying on the work of the institution, some idea of the magnitude of the work, of how our funds have been expended, and how well we have succeeded in kindling a dawn of happiness on the horizon of some little life.

MAGNITUDE OF THE WORK, 1875-1910.

In the thirty-five years of its existence, the Hospital has treated within its walls 16,837 children as In-Patients, and 100,959 as Out-Patients.

Of the In-Patients admitted, 12,067 were from the city of Toronto and 4,770 from other parts of the province.

Of the In-Patients, 8,549, or 51 per cent., were cured; 4,997, or 29½ per cent., were improved; 1,341, or 8 per cent., were unimproved; and 1,272, or 7½ per cent., died.

The total number of In-Patients and Out-Patients for the years 1875-1910 was 117,796, or an average of 3,366 per year.

Of the Out-Patient Department or Free Dispensary patients, the staff claims that about 80,760, or 80 per cent. of those treated, were cured, and about 10 per cent. were improved.

Your money has enabled us to do what we have done. Your money is a blessing to the child it helps, and the thought that you have helped a child is a blessing to you.

THE PAST TWELVE MONTHS' WORK.

The number of patients cared for during the year has been unusually large. From the 1st of October, 1909, to the 30th of September, 1910, there were 1,224 children admitted as In-Patients, of whom 684 were boys and 540 girls, an increase of 69 as compared with 1909.

Turning to the year 1875, the first year of the Hospital's life, the number of In-Patients was 44, or the weekly average number of patients was less than 6. Last year the daily, not weekly, average number was 151, an increase that was far beyond our most sanguine expectations. The previous year the average was 140.

The largest number of Hospital patients treated in any one day was 189; the smallest number 113.

In the Out-Patient Department, or Free Dispensary, 10,934 were treated, an increase of 137 over 1909.

The Hospital has thus the past year emphatically demonstrated the need for its existence. The demands on the accommodation which it affords are ever growing, and with the city's large and increasing population we find our resources taxed to the utmost. Your dollars are the bone and sinew of the great aims of the Hospital's mercy.

THE RESULTS OF TREATMENT, 1910.

Of the 1,224 In-Patients admitted during the year, 504, or 41 per cent., were discharged cured; 318, or 26 per cent., discharged improved; 103, or 8½ per cent., discharged unimproved; 154, or 12½ per cent., died; and 145, or 12 per cent., remained in the Hospital.

Of the 154 deaths during the year, 85 were boys and 69 were girls; 9 died within two hours of admission; 20 within eight hours of admission; 50 within

seven days; 20 within two weeks; and 38 within one month; so that 89 per cent. of the 154 were practically beyond hope when admitted.

Of the 10,934 Out-Patients, the staff claim that 8,757, or 80 p.c. of those who received treatment, were cured. and at least 10 p.c. were improved.

The Hospital can only help the little children as your pocket-book helps the Hospital.

THE HOSPITAL IS FOR ALL ONTARIO.

It is interesting to record that during the year, outside the city of Toronto, 441 patients were admitted from 267 places in Ontario. In 1909 there were 383 patients from 267 places in the province.

NATIONALITIES OF PATIENTS.

Of the 1,224 patients admitted, 709, or 58 per cent., were from Canada; 272, or 22¼ per cent., from England; 26, or 2 per cent., from Ireland; 58, or 4¾ per cent., from Scotland; 9, or ¾ per cent., from the United States; and the balance, 150, or 12¼ per cent., from foreign countries.

It is to be noted that over one-fifth of the patients treated are from England alone. This is accounted for by the large number of English immigrants, not only settling in the city, but throughout the province.

AGES AND SEX OF PATIENTS.

Patients are received from birth up to 14 years, and of the 1,224 patients admitted last year there were 684 boys and 540 girls. In 1909 there were 629 boys and 526 girls.

DAYS' STAY OF EACH PATIENT.

The number of days of hospital care for 1910 was 54,608. In 1909 the number of days was 48,355.

The average days' stay of each patient for the year 1910 was 44½. In 1909 the average was 42.

The above 44½ is arrived at by dividing the total number of in-patients, 1,224, into the total number of days of all patients.

No money is so well spent as that which brings happiness to others, and one suffering child made strong and well brings happiness to an entire family.

COST PER PATIENT PER DAY.

The cost per patient per day is arrived at by adding all the days that each patient has been in the Hospital from October 1st, 1909, until September 30th, 1910—the official year—and then dividing the days into the total expenditure.

The total number of In-Patients 1910 was 1,224, who were in 54,608 days, an average of 44½ days each.

The cost of each patient per day last year was \$1.52, or \$67.64 for the 44½ days' stay of each patient.

The cost in 1909 was \$1.63¼, or \$68.56 for the 42 days' stay of each patient.

In 1910 there were 1,224 patients in the Hospital for 54,608 days, at a cost of \$82,949.04.

Of the 1,224 patients admitted last year 67 per cent. received medical care and attention free, or 36,950 of the total number of days' service has been given to free patients.

Read twice the foregoing paragraph. Note what the Hospital is doing for Sick Children whose parents cannot afford to pay. Remember that 67 per cent. were treated free. You ought to be a friend indeed to a child in need.

SURGICAL OPERATIONS IN 1910.

The number of operations last year on In-Patients was 518, and on Out-Patients 372—a total of 890. The number of operations in 1909 in the In-Patient Department was 588.

Will you help us in our work? See on other pages what the skilled hand of the surgeon does for children who require operation. Your money can put golden hinges on the doors of the Hospital's mercy.

THE OUT-PATIENT DEPARTMENT OR FREE DISPENSARY.

This Department renders help to the many patients whose cases do not require Hospital confinement.

The total attendance during the past year was 10,934, an increase of 137 over 1909. There were 5,892 boys and 5,042 girls. The average attendance for the year was over 35 per day.

Of the 10,934 cases treated, there were 937 eye, ear, nose and throat cases; 601 orthopedic and 9,396 general.

In the dispensary or drug department there were 29,825 prescriptions or orders, including daily solutions, ward requisites and chemicals filled.

Do you realize what the foregoing figures mean? Nearly a thousand cases a month. If you could only see the suffering little ones at the Out-Door Department as the Hospital sees them, you would be quicker to give than the Hospital is to ask for money.

THE ORTHOPEDIC DEPARTMENT.

The mechanical shop with its up-to-date apparatus for turning out spinal braces, hip splints, leg supports, chin pieces, and braces for bow-legs, knock-knees and ankles, shows what is being done for the crippled and deformed little children of our Province.

Of the 1,224 patients who received treatment in the Hospital last year, 248 were treated for deformities, etc., 14 cases of Pott's disease of the spine, 65 club feet, 22 hip-joint cases, 36 tubercular spine, 18 bow-legs, 6 knock-knees, 16 dislocations of hip.

Do you realize that the crippled children, as shown by photos, in another part of the report, are now able to walk about just as if they never had a deformity? Will you give crippled children a fair start in life?

MASSAGE.

The usefulness of massage as an aid in Hospital work has been fully demonstrated by the wonderful results obtained during the year that has passed.

Of the 1,224 cases admitted to the Institution in 1910, 400 received massage treatment, some almost daily, and the total number of treatments 7,675. The patients were suffering from the following: Rheumatism, rickets, fractures (broken arms, wrists and legs), infantile paralysis, and stiff arms and joints.

Once a week also the masseuse gave treatment at the Out-Patient Department to children who had been discharged, but returned weekly for this treatment.

Massage is a great boon—a great feature in our work. A page of printed words could not contain the number of cases where children have been helped back to health by the hands of the masseuse.

THE GYMNASIUM.

Many new and valuable appliances have been added during the year, making the equipment of this department very full indeed.

Every patient requiring gymnasium treatment receives, under the doctor's supervision, attention for one-half to one hour daily during his or her stay in the institution. Through a system of measurements, the progress of the patient is estimated once a week. An average of six Hospital patients have been treated daily, and an average of three private patients daily. Swimming lessons for nurses, and miscellaneous exercises and corrections have been given.

Only as your money reaches the Hospital can the Hospital's mercy reach the children.

X-RAY AND PHOTOGRAPHY.

The records of the year's work show the following:—386 photographs taken, 1,124 sciagraphs made, 114 fluoroscopic examinations, 46 X-ray treatments for different diseases and 74 fractures reduced under the X-rays.

During the past year new instruments and improved methods have brought the X-Ray Department of our Hospital to a high position among the laboratories of the world. Noted visitors this summer, among whom were Dr. Wickham, of Paris, France, and Professor William Osler, of Oxford, expressed themselves as highly pleased with the progress made in this country with the X-rays.

The work done in this department has been brought before medical councils during the year, and exhibits were shown at St. Louis, Detroit and Winnipeg, and also sent to a medical convention in England.

As the X-ray casts its light on the fracture of a little child, so can your money be a lamp to cast radiance into the darkened lives of sick childhood.

THE LAKESIDE HOME.

The Lakeside Home for Little Children, on Toronto Island, was opened on the 11th of May to September 30th. During these months, 350 patients were treated. Since 1882, when the Home was opened, 4,920 have been admitted.

One hundred patients slept in the open in the beds and cots on the balconies of The Lakeside Home for the whole period of last summer. The average increase in weight of the children was about three pounds. The fresh air at The Lakeside has produced wonderful results.

THE SCHOOLROOM.

Last year 221 little patients of the Hospital attended in the schoolroom, or an average monthly attendance of 40. Children from the age of four to fourteen years were admitted, and the work covered the school course, starting with the kindergarten. Little ones who could hardly read and cannot write a line, after a couple of months in the school write letters to their parents. Mothers are amazed. One wrote to the Superintendent:—"Did my little girl write this letter? I can't believe it." Nevertheless, it was true.

TRAINING SCHOOL FOR NURSES.

The number who applied for admission to the school during the year was 150, of whom 50 were accepted.

Twenty-two pupils entered the school, and 22 nurses graduated, making a total of 226 graduates in the 25 years of the existence of the school.

There are now in training 57 nurses, of whom 6 are head nurses, 15 senior, 8 intermediate, 10 junior, and 18 probationers.

The following lectures were given: 35 for juniors, 30 for seniors, 2 weekly by the superintendent and her assistant, 1 lesson daily by the masseuse for seniors.

In the probationary course the following lectures were given: 2 weekly by special lecturers; daily classes and demonstrations by the teacher of probationers; daily gymnasium classes by a special teacher, and daily lesson in the diet kitchen.

The work done by the staff and nurses has been specially arduous during the year, owing to the large number of typhoid cases admitted, and the numerous cases of polio-myelitis, or infantile paralysis, which are being treated by the latest scientific methods.

THE VISITING OR DISTRICT NURSE.

This department was opened on the 2nd of December in 1908. The records of this work for the past year show that 3,000 visits were made by the visiting or district nurse. Her work is most satisfactory.

THE PASTEURIZATION PLANT.

This fully equipped Pasteurization Plant was donated by J. Ross Robertson, and all milk used in the institution is now scientifically pasteurized.

Since the installation of this plant the work in the diet kitchen has received valuable assistance. All the food and baby mixtures are specially prepared. Fifty-four gallons of milk are pasteurized daily for in-patients, and 512 bottles of baby food are prepared daily for outside babies.

THE DIET KITCHEN.

The work of the dietitian includes the training of probationers in the diet kitchen at the residence for nurses in a six weeks' course.

The preparation of the special diets by the nurses is also under the direct supervision of the teacher of dietetics.

Any diet ordered by a physician or surgeon is prepared in the diet kitchen in the Hospital, where the pupil nurses serve in their turn, and bring into practical use the training received during their probationary course.

A NEW FEATURE IN 1910.

The new pavilion, donated this year by J. Ross Robertson, for the treatment of children suffering from tuberculosis, was formally opened on the 5th of July, 1910, and handed over as a contribution to assist the "Heather Club," which is in affiliation with the Canadian Association for the Prevention of Tuberculosis. This club was organized two years ago by the Alumnae of the Hospital. The special care of the club is children under fifteen years suffering from tuberculosis.

NEW COTS DURING THE YEAR.

The following cots have, by the payment of \$2,000, been named in perpetuity in the Hospital on College street in 1910:—"The Bruce Lawlor Kingswell Cot," by Mr. and Mrs. E. C. Kingswell, Haileybury; "The Little Will's Cot," by Mrs. Laidlaw, Queen's Park, Toronto.

The following cot, by a payment of \$100 a year, was named to be maintained annually in the Hospital on College street:—"The Margaret Baldwin Cot," by Miss Bessie M. Baldwin, Toronto.

The following cots, by a payment of \$25 a year, were named to be maintained annually at The Lakeside Home, Toronto Island:—"The Good Cheer Cot," by Brownsville Methodist Sunday School, Brownsville; "The Arnprior Public School Cot," by Arnprior Public School; "The Maidstone Y. P. C. Cot," by Essex Young People's Circle.

BEQUESTS FOR THE YEAR.

The Trustees beg to acknowledge with thanks the following bequests from the Estates:

Of F. L. Beck, South Cayuga, \$2 088.54; of Mrs. Maria Battin, Toronto, \$250.00; of Miss Catherine Carr, Port Hope, \$2,000.00; of G. W. Lewis, Toronto, \$625.00; of Miss Janet Sibbald, Toronto, \$250.00; of John Beecroft, Owen Sound, \$99.85; of William Warren, Montreal, \$270.00; of James Gillies, Braeside, \$500.00; of Henry Goulding Toronto, \$45.40; of Miss Mary E. Wright, Toronto, \$100.00; of A. M. Smith, Toronto, \$2,000.00; of Robert Bishop, Toronto, \$800.85; of William Porteous, Uxbridge, \$1,995.46; of Mrs. E. S. Myers, New York, \$100.00; of Mrs. Mary Hooey, Thornbury, \$20.00; of Henry James Brantford, \$250.00; of Mrs. Jane P. Butt, Toronto, \$91.99; of Miss Ann Gormack, New Hamburg, \$498.00; of E. A. Forster, Toronto, \$2,000.00; of William Grey, Niagara Falls South, \$505.00; of Mrs. Sarah A. Zavitz, Ridgeway, \$100.00; of Robert Armstrong, Bowmanville, \$69.00; of H. C. Hammond, Toronto, \$2,500.00; of Thomas Tedder, Nashville, \$1,000.00; of Richard Gregory, Kingsville, \$55.00; of Miss Minnie Hiscott, Niagara-on-the-Lake, \$100.00.

RECEIPTS AND EXPENDITURES.

The receipts on maintenance account were \$77,449.17, while the expenditure on the same account was \$82,949.04. The expenditure shows an increase of \$3,967.54, which is due, mainly, to necessary expenses, the increased cost of staple articles in food, dispensary supplies, wages, etc.

The charges on capital account have also been considerable. The

general furnishings, furniture, etc., amounted to \$6,519.70. In this is included, however, the equipment and furnishings for the Pasteurization Plant, amounting to over \$3,000, and which was donated to the Hospital.

The permanent repairs to the Hospital in College street, amounted to over \$1,500.00, and the Tuberculosis Pavilion at The Lakeside Home, which was opened on July 5th, cost over \$1,300.00, which amount was donated.

In 1909, the cost of each patient was \$1.63¼ per day. Last year the cost was \$1.52 per day. The cause of the advance in the per capita rate in 1909 was partly due to an outbreak of measles and scarlet fever. This outbreak was the cause of lowering the total days' stay, as some of the Hospital wards had to be closed during the year. This condition, with the increased cost of food and other supplies, sent the per capita rate up to \$1.63¼. Last year we did not have any serious outbreak of infection in the Hospital, and the result was that the per capita rate was 11¼ cents less or \$1.52 per day.

THIS IS OUR APPEAL FOR AID.

You have helped us before—will you help us again? Will you ask your neighbor to help?

Our cause is the children's cause. Could there be one that has a stronger claim on the people of this Province?

The Hospital gives freely of its aid to every patient. Will you give freely, and in so doing remember that we help those who cannot help themselves?

If you could only see the dividends that the Hospital earns with your money—the human dividends, the children whose limbs are straightened, the sick ones whose bodies are strengthened, the suffering ones whose lives are brightened.

Will you close your heart and purse and let the Hospital be tied up by poverty, so that it cannot rescue the perishing children who are going down to death in the sea of human suffering?

May your pocket open at the touch of the Hospital's need as quickly as the Hospital's doors open at the touch of tiny fingers.

Yes, every dollar invested in the work of the Hospital pays dividends that are counted in the currency of kindness, a coinage that

"Neither moth nor rust doth corrupt,
Nor thieves break through and steal."

Your money can help to put golden hinges on the doors of the Hospital's mercy—big doors, but they open wide to let the little children in.

The Hospital is next-door neighbor to every home where children suffer and mothers sorrow. Won't you be neighbors to the Hospital?

"A Merry Christmas and a Happy New Year." These are figures of speech, but the only figures that do anything to make a Christmas merry or a New Year happy in the homes of suffering childhood are the figures of your contribution to the Hospital.

This is our appeal.

FOR THE TRUST,

E. B. OSLER,
GEORGE A. COX,

CHAIRMAN.

Won't You Give Your Dollars to Help the Hospital
put Health into the Lives of the Little Children
and Hope into the Eyes of their Mothers ?

The Pavilion for Tubercular Patients at The Lakeside Home

This Pavilion, for the special care of children under fifteen years of age suffering from Tuberculosis, was opened in July. It is under the auspices of the "Heather Club" nurses, all of whom are graduates of the Training School of the Hospital. Last summer there were 20 patients who enjoyed the fresh air in the open.

**THE FIRST T.B.
PATIENT**

SURELY
YOU
CAN
SPARE
A
DOLLAR ?

**A GROUP OF T.B. PATIENTS IN FRONT OF
THE PAVILION**

\$\$\$

You will not let them cry in vain,
Your cash its aid can lend,
Your help can cheer them in their pain;
You'll be the children's friend.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust—Dear Sir,—We beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and bank account throughout the year ending Sept. 30, 1910, and the accompanying statements of Income and Expenditure and of Assets and Liabilities bearing our signature are a true and correct account of the affairs of the Hospital to that date. The books and work of the office are well looked after, and all desired information has been freely given. Respectfully submitted,

Toronto, Oct. 7, 1910.

A. C. NEFF & CO., Chartered Accountants.

REMEMBER THE SICK CHILDREN IN YOUR WILL.

Two Thousand Dollars will name a cot and maintain it in perpetuity. If you cannot afford to name a cot, leave something, if it is only a few hundred dollars, that will help the cause along. Please use this form :—“I Give, Devise and Bequeath to The Hospital for Sick Children, Toronto,” the sum of \$

The incorporated name is “The Hospital for Sick Children, Toronto.”

The Hospital can only separate the Children from their miseries
as The Hospital's friends separate themselves from their money.

On the Velvet Lawn at The Lakeside Home.

The photo man has managed to get these twelve boys in perfect repose for about five seconds. They are all convalescents, and after five months at The Lakeside they will be sent home in perfect health to their parents. Surely this is a great work. Is it not?

Remember
that every
Patient at
The Lakeside
Sleeps on
the broad
Balconies
in the open.
Fresh air.
Great Life
Saver.

This record of especially the last twenty years shows that the objection parents have had to sending their sick little ones to the Hospital has been largely overcome.

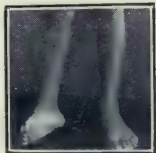

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

You Give YOUR MONEY and the Hospital Gives ITS
TIME to Straighten the Limbs of the Crippled
Child, to Restore Happiness to the Suf-
fering and Health to the Sick.

See What the Skilled Hand of the Surgeon Does
For Children Born with Deformities.

BEFORE

BEFORE

BEFORE

BEFORE

Remember that every crippled child in the Province whose parents can't afford to pay—is treated free in the Hospital for Sick Children.

These are photos of the feet of the children of poor people—mechanics and working men—whom the Hospital has helped.

Winter will go
Sickness will stay
With the needs of the children —
It's always To-day.

Your Money can put golden hinges on the doors of the Hospital's Mercy.

Do you realize that these Crippled Children, as shown by the photos, are now able to walk about just as if they never had a deformity?

There were 65 Cases in the Hospital last year.
60 had perfect results.

Such Work is Truly the
Marvel of Surgery

The Winter Kindnesses of the Rich are the Summer Mercies of the Poor.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto,

May your pocket open at the touch of the Hospital's
Need as quickly as the Hospital's Doors open
at the touch of tiny fingers.

Where our Milk is Pasteurized.

Pasteurization means purifying milk. All milk in bulk has bacteria. The count runs as high as 50,000 to the cubic centimetre, or to 16 drops of milk. All below 10,000 is considered good milk. In pasteurizing by our process, the same as that of the Nathan Straus plant in New York, milk is heated to 150 Fahr. for thirty minutes, immediately placed in cooling vats, where it is chilled rapidly, and is then ready for use. Pasteurization reduces the count to zero. Our bulk milk is "certified milk." The count before pasteurization averages from 2,000 to 3,000, so that we pasteurize first-class milk. Butter fat averages 3.5. Results are wonderful. Our pasteurized milk and modified mixtures have saved scores of lives of infants. Our pasteurizing plant is the only plant in the Dominion where milk is scientifically pasteurized.

If you heard the cries of the children as the Hospital
hears them you would be quicker to give your
money than the Hospital is to ask it.

Not for Its Own Sake but for the Children's, the
Hospital Seeks to touch the Heart
and Pocket of Humanity

INTERESTING SNAP SHOTS OF LIFE IN THE HOSPITAL

THE CENTRE OF ATTRACTION.

A baby with a wry neck who was a great favorite. Under treatment—considerably improved and best results are expected.

THE ANGELS OF A WARD.

A group of the faithful workers who watched day and night over the 1224 in-patients of last year.

A HAPPY HOUR.

This is a snap shot of half-a-dozen patients interested in reading and looking at picture books.

THE MASSEUSE AT WORK.

400 of the 1224 in-patients had massage last year—7675 treatments in all—fine results.

If You Could Only See the Dividends that the Hospital Earns with Your Money---the Human Dividends, the Children Whose Limbs are Straightened, the Sick Ones Whose Bodies are Strengthened, the Suffering Ones Whose Lives are Brightened.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec-Treas., College Street, Toronto.

Since the year 1875 to the year ending September 30th, 1910.

HOW THE X-RAY HELPS THE SURGEON

SEE RESULTS
IN 5 OUT OF
136 CASES

IN EVERY CASE RESULT WAS PERFECT

FRACTURED ELBOW.

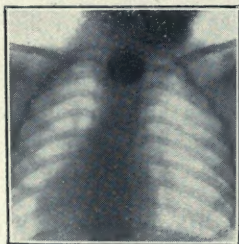

BEFORE AND AFTER.

The owner of this elbow won't talk about cherry trees.

FRACTURED LEG.

BEFORE AND AFTER.

COIN IN THROAT.

This coin was located by the X-Ray and removed in a few minutes. The joy of the parents at the result would have done your heart good.

SCIAGRAPHS OF A FEW CASES IN 1910

The photo on the left shows the fractured elbow of a lad that fell off a cherry tree. The result after treatment shows a perfect correction of the arm. The X-Ray gave the surgeon the exact displacement.

The patient in the photo on right had stone in the bladder. There was no probing to locate its position. The X-Ray placed it and the surgeon successfully removed the stone.

The Sciagraph on the left shows the broken leg of a lad from Hastings County, who fell off a waggon, before and after treatment by the surgeon. The photo on the right shows the lad ready for home. He was eleven months in The Hospital.

Located by the X-Ray and successfully removed.

PERFECT
RECOVERY.
READY TO
GO HOME.

Don't these
Results tell
a Story ?

Ready for Hockey

DISEASED BONE.

This shows a diseased bone in leg of a little girl. Carefully watched for three years and treated. Now ready for home.

MONEY AND MERCY MAKE A GREAT TEAM

—YOUR MONEY AND THE HOSPITAL'S MERCY

Hare Lip Vanishes at the Command of the Surgeon

Three Examples Out of Eighteen All Corrected

BEFORE
An ugly lip on admission to the Hospital

Remember that All These Patients were Children of Poor People of Ontario, Whose Parents Were Unable to Pay for Treatment.

In 35 Years There Have Been 250 Cases of Hare-lip. Seventy-five per cent. were Successful in Removing the Deformity.

See what a Blessing Your Money Would Be in the Life of Some Suffering Child.

Won't you give it and Help the Little Ones Who Suffer from this Deformity and Who Cry to You for Aid?

The Camera Tells the Story—a Story Without Words.

**You Can Help
Us to Do the
Good Work.**

AFTER
But a handsome lip after 7 days' treatment.

BEFORE
This was another bad case.

AFTER
But this is the result three years later.

BEFORE
A terrible disfigurement.

AFTER
Three weeks later.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec-Treas., College Street, Toronto.

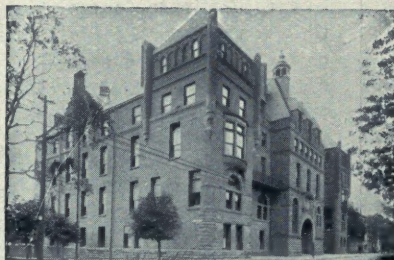

You've seen that picture of "The Doctor" fighting for the life of a little child with the father and mother looking on in an agony of hope and fear. Well, that's how the Hospital for Sick Children fights always, and, God be thanked, wins often with the help of such friends as you and your \$ \$ \$.

HOSPITAL FOR SICK CHILDREN

COLLEGE STREET, TORONTO, CANADA.

STORY OF ITS WORK IN NINETEEN-TEN

The eloquence of Suffering Little Children and the oratory of their mothers' aching hearts—these appeal, and not in vain, for the help the Hospital can draw from the pockets of its friends

THE HOSPITAL BUILDING

Within the walls of this great building there were treated 1,224 patients; 441 of whom came from 267 places from outside, and 783 inside, Toronto.

Poverty and pain are the wolves at the door of many a young life, but your money and the Hospital's mercy can drive them away.

THE LAKESIDE HOME FOR LITTLE CHILDREN AT TORONTO ISLAND

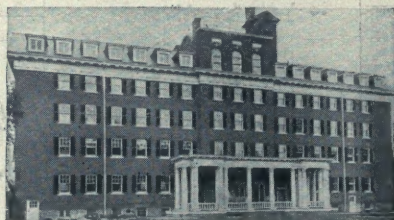

"Write me as one who loves his fellow man," said good old Abou Ben Adhem, and "write me as one who loves little children," says every contributor to the Funds of the Hospital.

No money is so well spent as that which brings happiness to others, and one Suffering Child made strong and well brings happiness to an entire family.

This is the Summer Sanatorium for the patients of the Hospital. There were 350 in there last summer. Results of fresh air are wonderful. The average number daily was 120, and of these 100 slept for five months—May till October—in the open balconies.

Your money should be a lamp to cast radiance into the darkened lives of suffering childhood.

You can spare a dollar more easily than some little child can spare his or her health.

THE NURSES' RESIDENCE, HOSPITAL GROUNDS

Speculation may earn or lose money but the Hospital pays a big and sure dividend to you in the gratitude of a cured child.

You ought to be a friend in Deed to a child in Need.

The Nurses' Residence, where the Superintendent, staff, sixty-one nurses and twenty-one domestics live. The residence is up-to-date in equipment, with lecture, demonstration, and study rooms. The medical library contains every book in the English language on nursing. Every nurse has a separate room, well ventilated and comfortably furnished. There are parlors on each floor, and reception, music and writing rooms. The diet kitchen is in the building, also gymnasium and swimming pool. Perfect sanitation and good food are characteristics of the Residence. The Residence was a gift to the Hospital.

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.
